

**THE WORLD'S FIRST GLOBAL HEALTH AND SAFETY MANAGEMENT SYSTEM,
TO HELP YOU TO PROTECT YOUR MOST IMPORTANT ASSET, YOUR PEOPLE.**

WHAT ARE ISO STANDARDS?

Think of them as a formula that describes the best way of doing something. Eg. Making a product, managing a process, delivering a service or supplying materials – the standards cover a huge range of activities.

For instance:

Quality Management

To help work more efficiently and reduce product failures

Environmental & Energy Management

To help reduce environmental impacts, reduce waste, help cut energy consumption and be more sustainable.

Health & Safety Standards

To help reduce accidents and improve well being in the workplace.

Food Safety Standards

to ensure food safety and legality is not compromised

IT Security Standards

To help keep sensitive information secure

ISO 45001 is the international standard for occupational health & safety, used to protect employees and visitors from work-related accidents and diseases.

For the first time internationally businesses of all sizes can now access a single framework that offers them a clear pathway to developing better and more robust occupational health & safety measures.

ISO 45001 was designed to take other existing occupational health & safety standards such as OHSAS 18001 into account – as well as the ILO's labour standards, conventions and safety guidelines.

ABOUT ISO 45001

SENIOR MANAGEMENT has the ultimate goal of helping businesses to provide a healthy and safe working environment for all who work and visit the site. Mitigating any factors that are harmful or that pose a danger to peoples' physical and/or mental well-being.

OH&S RISK & OPPORTUNITIES a systematic approach to assess, monitor and review safety performance and set objectives for continual improvement within the 'context' of the organisation's activities.

COMPLIANCE OBLIGATIONS the standard also provides a structure to monitor and review compliance obligations to ensure the organisation is legally compliant including products and services.

OUTCOMES may reduce downtime, lead to reduction or prevention of worker loss time hours and potential prosecution.

REPUTATION With the emphasis on workers taking an active role in OH&S matters this can have positive benefits on an organisations reputation as a safe place to work leading to staff retention, motivation and greater productivity.

INTERNAL & EXTERNAL AUDIT PROGRAMMES provide scrutiny and effectiveness of the OH&S management system.

Global QA Consultants

- Can help you identify the right standards for your business
- Successful track record in all most widely used standards
- Fixed consultancy fee
- Guarantee of Success
- Worldwide service

Our Consultancy Service

The prospect of implementing and achieving certification to a standard that you have little knowledge of and may have never even read can be daunting. The man hours spent interpreting a standard and attempting to create a compliant system can soon add up and may not result in great success.

Global QA Consultants are fully trained to interpret the standards for you - whilst our philosophy is to:

KEEP IT SIMPLE - Whilst adding value

Certification to ISO assures your professionalism. It improves your business processes, helps you monitor and control service and quality standards and demonstrates your 'best practice' acumen to clients and industry bodies.

Our Guarantee:

We work to a fixed consultancy fee with a

100%
Guarantee of success.

So What's involved?

Global QA Consultants will take you through the potentially challenging and involved operation of achieving your required ISO Certification. You will be guided through the entire process by an experienced consultant who will ensure that you are successful in achieving ISO Certification.

Initial meeting with you to understand your organisation and its needs:

We like to meet at your site – no obligation or cost involved. We need to find out what you do, establish the scope of the certification which will then enable us to provide you with a quotation for our services.

Consultant Assigned

A dedicated consultant is assigned to your project. They will: interact with directors, management and personnel. Convert your shared knowledge into a working quality management system.

Provide in-house training on all elements of the system. Make regular visits on-site to advise on structured implementation and how to generate evidence that you are working to the system. Assess the compliance of your existing processes and procedures against the Standard advising accordingly on any changes or additions that need to be made. These are tried and tested, simple and effective management controls avoiding unnecessary systems and paperwork.

QMS Documentation

Your consultant will work to improve your business and eliminate unnecessary paperwork. They will assist in producing essential documented information in order to provide evidence that you are working to the system for continual improvement, training and assessment purposes.

Your Global QA Consultant will also create your own documented Quality Management System (QMS) specifically for your business.

Assistance in Application for Certification Body (CB) Assessment.

We will advise you of the various ISO approved certification bodies competent to audit your system, obtain a quotation from the CB of your choice and arrange dates for assessment. Its just like learning to drive - we will teach you but you need to have an independent test (audit) to ensure you understand what you are doing and you are doing what you say you are doing! The assessment process can be daunting to those experiencing it for the first time.

Your consultant will attend during the audit and help you to point your assessor in the direction of the evidence they are seeking.

Simply Celebrate!
With our Guarantee of Success!
